HRC INDUSTRIES

Quality and innovation
for the Ho.Re.Ca. sector through
five brands of excellence

HRC Industries is a new company that brings together five brands of excellence in a homogeneous and dynamic group for the supply of equipment to the Ho.Re.Ca. industry. It has been created to ensure a rich and targeted offer of reliable and advanced solutions for cooking, preparation, food display and distribution, professional dish washing and water treatment.

The five companies involved are Emainox, Heko, Pizart, Ever Oven, Walo Professional.

The project aims to develop profitable synergies, share ideas and know-how, integrate specializations to create value and proactively respond to the needs of a sector in continuous transformation which, in addition to paying great attention to quality, always demands more innovation in terms of product and service.

EMAINOX

Advanced customized solutions
for food display and distribution

Emainox designs and produces professional equipment for food display and distribution. Since its foundation in 1987, it stands out for reliability and perseverance in innovating, placing advanced technologies, design and know-how, distinctive values of Made in Italy, at the service of the most demanding international markets and of a constantly evolving professional scenario.

HRCINDUSTRIES

Emainox responds to customer requests with a tailor-made approach, focused on in-depth knowledge of all the technical and design aspects, offering customized solutions, perfectly adhering to the most specific needs.

HEKŌ

Professional high performance
and energy efficient
customized kitchen units

Heko designs and produces professional electric kitchen units complete with every element. Through ingenuity, experience and close collaboration with the customer, the company turns specific requests into tailor-made solutions.

HEKO

smart kitchen

Heko creations are characterized by efficiency, durability, high energy performance, safety, ease of cleaning and maintenance. They share a reinforced structure, worktops strictly in stainless steel and top-quality electronic components. The skills of a specialized technical staff, who personally assemble and test every kitchen unit's component, guarantee excellent results.

PIZART

Professional pizza ovens,
equipment and accessories

Pizart designs and manufactures professional equipment for preparing and cooking pizza. Combining attention to the dictates of tradition with an eye projected to the world of catering, where quality has to absolutely be combined with the utmost efficiency, the company covers the entire spectrum of needs, producing several lines of ovens, dough mixers and rollers, oven bases and a complete range of accessories.

EVER OVEN

Professional ovens for culinary arts
and bakery products designed
and built to satisfy any requirement

Ever Oven designs and manufactures professional ovens for culinary arts and bakery products: convection and combi ovens, equipped with core probe cooking and self-washing systems, technologically advanced and made with great attention to detail.

There are many models available, diversified according to the cooking mode and type of control. The company stands out for its ability to offer solutions designed to meet even very particular needs, both in terms of features and size.

HRC INDUSTRIES

WALO PROFESSIONAL

Technologically avant-garde
professional dishwashers
and water treatment systems

Walo Professional manufactures professional dishwashers and advanced water treatment systems. Thanks to a fully operative R&D Laboratory, which tests cutting-edge solutions, it develops products with innovative features, combined in a comprehensive range.

Energy efficiency, high performance and Made in Italy quality without compromises have allowed Walo Professional products to win the approval of the strictest markets, with the support of a structured sales network able to operate at an international level.
